

Project Development Phase

Machine Learning Model Performance Test

Date	29 September 2026
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	10 Marks

Model Performance Testing:

Machine-learning performance metrics are not applicable to this project because the Metro Ticket Generating System does not contain a regression or classification model. The current implementation is deterministic and configuration-driven in ServiceNow.

S.No.	Parameter	Values	Screenshot / Evidence
1	Metrics	Regression Model: MAE - N/A, MSE - N/A, RMSE - N/A, R2 - N/A. Classification Model: Confusion Matrix - N/A, Accuracy Score - N/A, Classification Report - N/A. Reason: no trained ML model exists in the current project.	Not Applicable
2	Tune the Model	Hyperparameter Tuning - N/A Validation Method - N/A The project instead validates deterministic fare logic, workflow conditions, mappings, QR rendering, and security.	Use functional/UAT evidence instead
