

# Project Development Phase

## Power BI Performance Test

|               |                                              |
|---------------|----------------------------------------------|
| Date          | 29 September 2026                            |
| Project Name  | Metro Ticket Generating System in ServiceNow |
| Maximum Marks |                                              |

### Performance Testing:

Power BI is not part of the current Metro Ticket Generating System implementation. Travel analytics is documented only as future scope. The table below records that status without claiming unimplemented dashboards.

| S.No. | Parameter                   | Screenshot / Values                                                                       | Evidence       |
|-------|-----------------------------|-------------------------------------------------------------------------------------------|----------------|
| 1     | Data Rendered               | N/A - No Power BI report is implemented.                                                  | Not Applicable |
| 2     | Data Preprocessing          | N/A - Data is stored and processed within ServiceNow records/custom tables, not Power BI. | Not Applicable |
| 3     | Utilization of Data Filters | N/A - No Power BI slicers/filters are implemented.                                        | Not Applicable |
| 4     | DAX Queries Used            | N/A - DAX is not used in the current project.                                             | Not Applicable |
| 5     | Dashboard Design            | 0 Power BI visualizations/graphs in current version. Analytics dashboard is future scope. | Not Applicable |
| 6     | Report Design               | 0 Power BI report visualizations/graphs in current version.                               | Not Applicable |
